

CHEM-Free Series

Premier CHEM-free filters can

- Eliminate Iron Problems
- Neutralize Acidic Water
- Reduce Rotten Egg (Sulfur) Odors

CHEM-Free Filter Systems

These systems reduce iron, manganese and hydrogen sulfide by injecting air as an oxidizer.

Dissolved iron and manganese are converted into a solid which is filtered from the water.

Periodically, the system automatically backwashes the accumulated contaminants down the drain.

- ☒ Eliminates stains in plumbing fixtures and laundry
- ☒ Water and beverages taste better
- ☒ Prevents pipes and water-using appliances from plugging with iron deposits
- ☒ No chemical regenerant is needed. . . no chlorine, salt or potassium permanganate
- ☒ Very low maintenance
- ☒ Reduces hydrogen sulfide gas (rotten egg) odor
- ☒ Elevates the pH of acid water, which reduces corrosion
